Beautiful Darwin Tulips

Are now so well known and thoroughly appreciated that they need little further introduction. They are very easily grown and require practically no care after planting. You will get more joy out of a bed or border of these fine giant Tulips in early spring than almost anything else you can have in your garden. Most varieties grow from 25 to 30 inches high, on stiff stems holding the flower erect. For best effects they should always be planted in solid colors, either in blocks of 50 or more, or in groups of 12 to 15 in the border or among shrubs. They last a long time in water and are therefore very valuable as a cut-flower. Darwin Tulips can also be grown under glass but must not be forced too rapidly.

COTTAGE TULIPS

Cottage Tulips have been found growing about the country houses and cottages in England and France for years—hence their name. They comprise the most exquisite colors and are charming when planted in borders of perennials or shrubs. They multiply rapidly, are perfectly hardy, and will last and flower well for three years. Need not be covered in winter. Same cultural directions as given for Darwin Tulips.

Cottage Tulips, Avis Kennicott

BREEDER TULIPS ARE HARDY AND BEAUTIFUL

BREEDER or "ART" TULIPS (MAY-FLOWERING)

As tall and stately as the Darwins and perhaps the most popular of all late Tulips today, and justly so, for in this class we find Nature's happiest color combinations in harmonious blendings of purple and bronze, yellow and bronze, brown and orange, gray and lilac, and buff tones, producing a most artistic effect by their refined colors. In many varieties the flowers are even larger than those of the Darwins.

California's Rarest Bulbs HARDY IN EASTERN GARDENS

Calochortus

Dog-Tooth Violet

CALOCHORTI (BUTTERFLY TULIPS)

The lovely Mariposa and Lantern Tulips with markings much like those of a butterfly's wings will endure our coldest winters, but suffer from premature thawing followed by freezing, and should therefore have light covering of leaves after ground is frozen. Plant any time from October 1 till frost, 2½ inches deep and 2 to 3 inches apart.

Albus, Fairy Lantern. "Globe Tulip," balloon-like flowers of purest white. 75 cts. per doz., \$5 per 100.

A Mixture of Fine Mariposa Tulips. 75 cts. per doz., \$5 per 100.

ERYTHRONIUMS (DOG-TOOTH VIOLETS)

Most lovely of all woodland plants, do well in shady spots, are fine in the rockery, grow anywhere and increase rapidly. The colors run in delicate tints of White, Pink, Cream, Yellow, and even Rose. Hardy everywhere; plant from September to frost, 3 inches deep and same distance apart. A superb mixture. 75 cts. per doz., \$5 per 100.

BRODIAEAS

These are fine for naturalizing under shrubs, trees in meadows, and rockeries; all are very lovely. Culture same as Calochorti.

Hendersoni. Blue, with a deep purple band down the center of each petal. \$1 per doz., \$6 per 100.
Laxa. Deep blue blooms. 75c. per doz.
Stellaris. Clear blue. 75 cts. per doz., \$5 per 100.

CAMASSIAS

These are perfectly hardy everywhere and will thrive in any soil. They do well when naturalized in woods or on the sides of ponds and streams. Plant 4 inches deep and 5 inches apart, in masses of 25 to 100.

Leichtlini, Blue to Purple. 4 feet high and often bears 50 to 75 evenly formed, star-shaped flowers on a stem. \$1.50 per doz., \$10 per 100.
Leichtlini, Cream. Beautiful; reminds one of the Eremurus. \$1.50 per doz., \$10 per 100.

Narcissi or Daffodils

What else so cheerful as the Daffodils that greet you early in spring? Of snowy white or mellow gold, they bloom profusely—almost anywhere, even in poor soil. Once planted, they multiply and bloom more abundantly and charmingly year after year without care.

Plant these bulbs generously on your lawn (for they will be through blooming before you cut the grass), along your shrubbery border, or fringing the roadside, or even in the nearby woods—anywhere they will grow unmolested—and you will reap unbounded joy every spring when they are in bloom. Plant bulbs 6 inches deep and the same distance apart. Daffodils are easily grown in pots for winter blooming, the Large Trumpet and Double-flowering varieties being especially good for that purpose. Directions for growing Daffodils in pots or fiber will be furnished on application.

Why You Should Buy Narcissi and Daffodils this Year

After 1925 the importation of Narcissi bulbs into the United States will be prohibited, and while a considerable quantity is already grown in this country, the supply will be entirely inadequate for several years to come. Prices will, of necessity, be much higher.

Planting Narcissi is a Permanent Investment. They increase and multiply rapidly and flower for many, many years. Buy Narcissi now while the fine plump bulbs from the wonderful fields of Holland are yet available and at a reasonable price.

Our Special Mixture of Narcissi for Naturalizing and Lawn Planting

A wonderful assortment of Large Trumpets, Medium Trumpets, Short-cupped, Poet's, Single and Double, all first-class bulbs, sure to bloom.

HERALDS OF SPRING BARRED AFTER JANUARY 1

NARCISSUS ODORUS (Jonquils)

Miniature Daffodils with dainty, fragrant blossoms, perfectly hardy.

Campanelle. Bright yellow. \$1 per doz., \$7 per 100, \$65 per 1,000.

Rugulosus. Deep golden yellow. \$1 per doz., \$7.50 per 100, \$70 per 1,000.

Single Sweet-scented Jonquils. 65 cts. per doz., \$4.50 per 100, \$40 per 1,000.

POLYANTHUS NARCISSI

The abundance of fragrant flowers, borne in clusters on long stems, makes these most desirable for culture in pots, pans, or bowls. They are not hardy, but bloom quickly in the house, force easily, and are popular as cut-flowers at the Christmas and Easter seasons and also all during the winter months.

Paper-White Grandiflora. Pure white. The popular variety for early forcing. Jumbo Bulbs, \$1.50 per doz., \$9 per 100. Mammoth Bulbs, \$1 per doz., \$6.50 per 100, \$60 per 1,000.

Soleil d'Or. Golden yellow, sometimes called the Yellow Paper-White. Like the preceding, it is a great favorite with amateurs and gardeners for forcing.

Jumbo Bulbs, \$3 per doz., \$20 per 100.

Mammoth Bulbs, \$2.50 per doz., \$16 per 100.

First-Size Bulbs, \$2 per doz., \$14 per 100.

POETAZ NARCISSI

These are hybrids of the hardy Poeticus and the Polyanthus types, with the characteristics of the latter, having four or five flowers to a stem. They are perfectly hardy outdoors and fine for pot-culture.

Elvira. Pure white, yellow cup; flowers in clusters. \$1.75 per doz., \$11 per 100, \$100 per 1,000.

Admiration. Pale yellow cup, edged scarlet. \$3.25 per doz., \$24 per 100.

Mignon. White perianth, cup creamy white with scarlet edge. \$3 per doz., \$20 per 100.

DOUBLE DAFFODILS

Alba plena odorata. Double; pure white Poet's Narcissi; very scarce. \$1 per doz., \$8 per 100, \$75 per 1,000.

Golden Phoenix. Golden yellow; rose-shaped flowers. \$1.50 per doz., \$10 per 100, \$95 per 1,000.

Sulphur Phoenix. Silvery white with sulphur center. \$1.50 per doz., \$10 per 100, \$98 per 1,000.

Van Sion. The true deep golden yellow Daffodil. Top roots, \$1.50 per doz., \$10 per 100, \$95 per 1,000. First-size bulbs, \$1.25 per doz., \$8.50 per 100, \$82 per 1,000.

CHINESE SACRED LILIES

For growing in bowls with pebbles and water or in fiber. Mammoth Bulbs, 35 cts. each, \$3.50 per doz. Jumbo Size, 50 cts. each, \$5 per doz.

The Heralds of Spring

will be barred again from import January 1, 1926, and now is your last chance to buy these lovely spring beauties. Plant them freely through your lawn, shrubbery, and perennial borders and rockeries. They will yield rich dividends of pleasure as they increase in beauty and numbers from year to year.

Scilla sibirica

Grape Hyacinths

Extra-Selected Dutch Hyacinths

TOP ROOTS (Exhibition Bulbs)

A special pick of the largest bulbs produced in Holland. Sound, plump, and well matured, producing strong spikes of great length—you can buy no better. This size should always be selected for pot or glass culture, as they are far more vigorous in growth and produce larger and finer flower-trusses than the smaller bulbs. Unexcelled for outdoor planting for the same reason.

Hyacinths grow in any good garden soil, but a well-enriched soil induces more perfect growth and larger flower-spikes. Well-rotted barnyard manure, sheep-manure, or bone-meal, liberally applied, well dug in, and mixed with the soil is very helpful. Set bulbs 6 inches apart each way and 6 inches deep (to bottom of bulb). Hyacinths are perfectly hardy, but a light covering of salt-hay, leaves, or straw, after the ground is frozen, will prove beneficial.

Hardy Garden Lilies

No garden is complete without at least a few of these stately beauties, the blooming season of which may be extended from June to September if the proper varieties are planted. Large plantings of *L. candidum*, *L. tigrinum*, and the Speciosum varieties are recommended, and also the handsome early-blooming American varieties, *L. elegans* and *L. superbum*. They thrive in any well-drained garden soil, but do best in the hardy border or among shrubbery. Plant bulbs twice their depth and when frost sets in, cover with 4 to 6 inches of leaves or litter, which should be removed in the spring.

JAPANESE LILIES

Plant Your Roses in the Fall

IT IS THE BETTER TIME AND YOU HAVE MORE TIME TO DO IT RIGHT

Contrary to general belief, experiments have proven conclusively that Roses planted in late autumn will produce the best results. The success of the Rose in this country is largely a question of the selection of adaptable varieties and the preservation of a good, healthy root system. It is, therefore, apparent that plants freshly dug and transplanted in late fall should have an advantage over those dug in fall, stored over winter in sheds, and disturbed a second time when shipped in spring, for every time a plant is lifted, no matter how carefully done, the root system is disturbed, necessary fibrous roots are lost, and the vitality of the plant is lessened.

Buying Roses in the fall saves storage charges—it is cheaper.

Buying Roses in the fall assures you strong, healthy plants with good roots—very important.

Planting Roses in the fall gives you a better chance for the careful preparation of the soil and assures you best results.

In planting Roses, the graft or bud should be 2 inches below the soil. Just before the ground freezes, draw the soil up against the plant, in the same manner as you would hill up potatoes, and cover with leaves or salt-hay. The chances of losses from fall planting will be less than from spring planting.

We ship about November 1—order now

Indoors—Right in Your Own Home Grow Bulbs for Winter Cheer in Schling's Prepared Bulb Fiber

And no need of ugly pots, either! Use a bowl of your favorite color, blending with the furnishing scheme of the room. This will lend an additional charm to your plant—you will enjoy it so much more.

Our Bulb Fiber is a complete substitute for soil, scientifically prepared for use in receptacles without drainage. It is clean and odorless; no saucers necessary, no fear of staining the woodwork or table coverings. And bulbs really grow better in it than in soil, for it absorbs and holds an even moisture, and on account of its fluffiness allows the roots to penetrate freely. This Fiber is cleverly impregnated with plant-food in such a manner that it becomes available gradually but continually as required by the plants to assure a steady, healthy and vigorous growth.

Growing Bulbs in Our Prepared Fiber is a Fascinating Process. It is lots of fun to watch them grow and bloom. And all you have to do is to keep the Fiber moist!

DIRECTIONS FOR USING BULB FIBER

Wet the Fiber thoroughly until it has absorbed all the water it can hold. This is best done in a pail or pan. Then squeeze out nearly all the water and it will be just right for planting. Fill the bowl three-fourths full, or to within a few inches of the top, according to the size of the bulb. Press down gently (never pack it down), set bulbs at the proper distances, and fill up with Fiber. Press it gently around the bulbs but *don't* pack it down. Keep the Fiber damp, by spraying it lightly every day, but never allow it to become too wet. All bulbs, except Freesias, Callas, and Lily-of-the-Valley should be kept in a dark place to develop roots before sprouting. Hyacinths, Daffodils, and Tulips require from four to six weeks; Paper-White, and Soleil d'Or Narcissi and Chinese Lilies from two to three weeks. By bringing in a few bowls at intervals and making additional plantings, one may enjoy blooming plants all through the winter months

Lily-of-the-Valley Pips. Especially selected and especially treated for growing in fiber. The most satisfactory of all bulbs for house culture. No failure. Will bloom in 21 days from the time of planting. \$1.50 per doz., \$2.50 for 25 pips, \$8 for 100 pips.

To assure a continuous bloom throughout the winter, plant every three weeks. These bulbs are kept dormant on ice and must be planted as soon as thawed out, therefore order only sufficient for each planting, as you cannot keep the bulbs. Enjoy these beautiful flowers in your home all through the winter. Let us book your full order. Specify the quantity you require for each planting, and we will ship every two or three weeks as you direct.
